

## Energy Use Data and Standards Levels for Dishwashers

**\*\*Energy use calculations incorporate the 2003 DOE test procedure assumption of 215 wash cycles/year**

**\*\*2010 standard level requires maximum water use of 6.5 gallons per cycle**

**\*\*2013 standard level requires maximum water use of 5 gallons per cycle**

**\*\*Shipment weighted energy use data from AHAM, "Trends in Energy Efficiency 2010"**
